

Lia Justiniano dos Santos

Activities and professional life

- Dedicated to civil law and litigation law throughout a long and fruitful career with the adoption of Arbitration Law, envisioned the new horizon that was formed in the world of conflict resolution. From that moment I have included into my professional goals the study, dissemination and the exercise of new methods and new paradigms for conflict resolution through the ADR, keeping constantly upgrading in the areas of litigation.
- Parallel, throughout my career, I have actively participated in PNBE activities (Pensamento Nacional das Bases Empresariais) which is aimed at the development of the national business and the expansion of the citizenship as a whole;
- In legal circles, my participation in professional associations - Council of AASP and Sectional Council of OAB / SP – were aimed to contribute to the advancement of legal knowledge and the development of collective actions of scale in the interests of the lawyer class;
- I have been developing extensive and profound associative work and the dissemination and development of Mediation and Arbitration, while participating at CONIMA;
- Organizing courses, teaching classes and acting as participating Conciliator since the introduction of the conciliatory model in the Paulista judiciary system;
- Coordinated the first covenant between an institution of conflict mediation (CEREMA) and the Arbitration Chamber (SP ARBITRAL - Câmara de Arbitragem Empresarial de São Paulo) with the focus on solving business disputes;

- I joined and took part in the IBDFAM, the IBDP, the IBDiC, the CBAR, institutions which are seeking a renewal and deepening of legal knowledge and also means of extrajudicial and consensual for conflict resolution;
- Attended lectures and conferences hosted in Brazil and abroad. I wrote articles, gave interviews to radio and TV divulging the progress and new knowledge of the legal world;
- This journey brought together a wide and diverse collection of information, study and experience that can be used and be transformed into reality.
